March 21, 1985

Dear Harold,

A query which cannot be answered from Frame-Up, although I'm sure it probably has a very obvious answer. MLK Crime Scene: I know that you are very familiar with Brewer's boarding house and I cannot figure out why no one mentions the roof of the boarding house or the windows in the furniture company next door as possible sniper locations. Were both inaccessable? From the FBI photos, both the roof and the furniture-factory window nearest the window in Brewer's bathroom look like good locations, trajectory-wise.

My wood chopping is on hold while I await 40-50 degree temperatures. I can jog at 30 degrees, but not chop.

Best regards,
